

November 23, 2020

As a Nurse Practitioner and a family member of an aging relative, I have the opportunity to recommend a great service.

Heart & Home In Home care is an essential service that our community is very fortunate to have. Jessica Paul, as the leader of this Program, has proven she is a 'jack of all trades'. Her compassion and energy are key to the success of this Program.

This Program offers services that range from personal care, medication reminders, meal preparation, housekeeping, and in home safety evaluation to grocery shopping and rides to appointments. Talk about 1 stop shopping.

I have witnessed that many elderly and disabled patients that I have cared for want to remain in their own homes or sometimes in an Assisted Living Facility, with needed care brought to them.

The variety of services this Program offers can be instrumental in allowing the elderly to age in place, in their own homes or the site of their choosing.

These services can also be additive to Home Health Care Skilled services or Hospice services. These services provide care a few times per week. Heart & Home can add hours and/or days for additional support and care needed.

Deb Myers APRN (Nurse Practitioner)
